

Nutrition Week

(2023-24)

Classes: I and II

Dear Parents,

Namaste!

We're thrilled to share the success of Nutrition Week in grades 1 and 2. Our students had fun during this week and the special sharing party.

The aim of this activity was to teach the importance of healthy eating from an early age. During Nutrition Week, our children learned about nutritious foods, interesting food facts and the joy of sharing.

This event encouraged healthy eating habits and social interaction among the children.

Thank you for your support in fostering these habits in our young students.

Warm Regards

Nutrition Week
